

This is a BAD visualization.

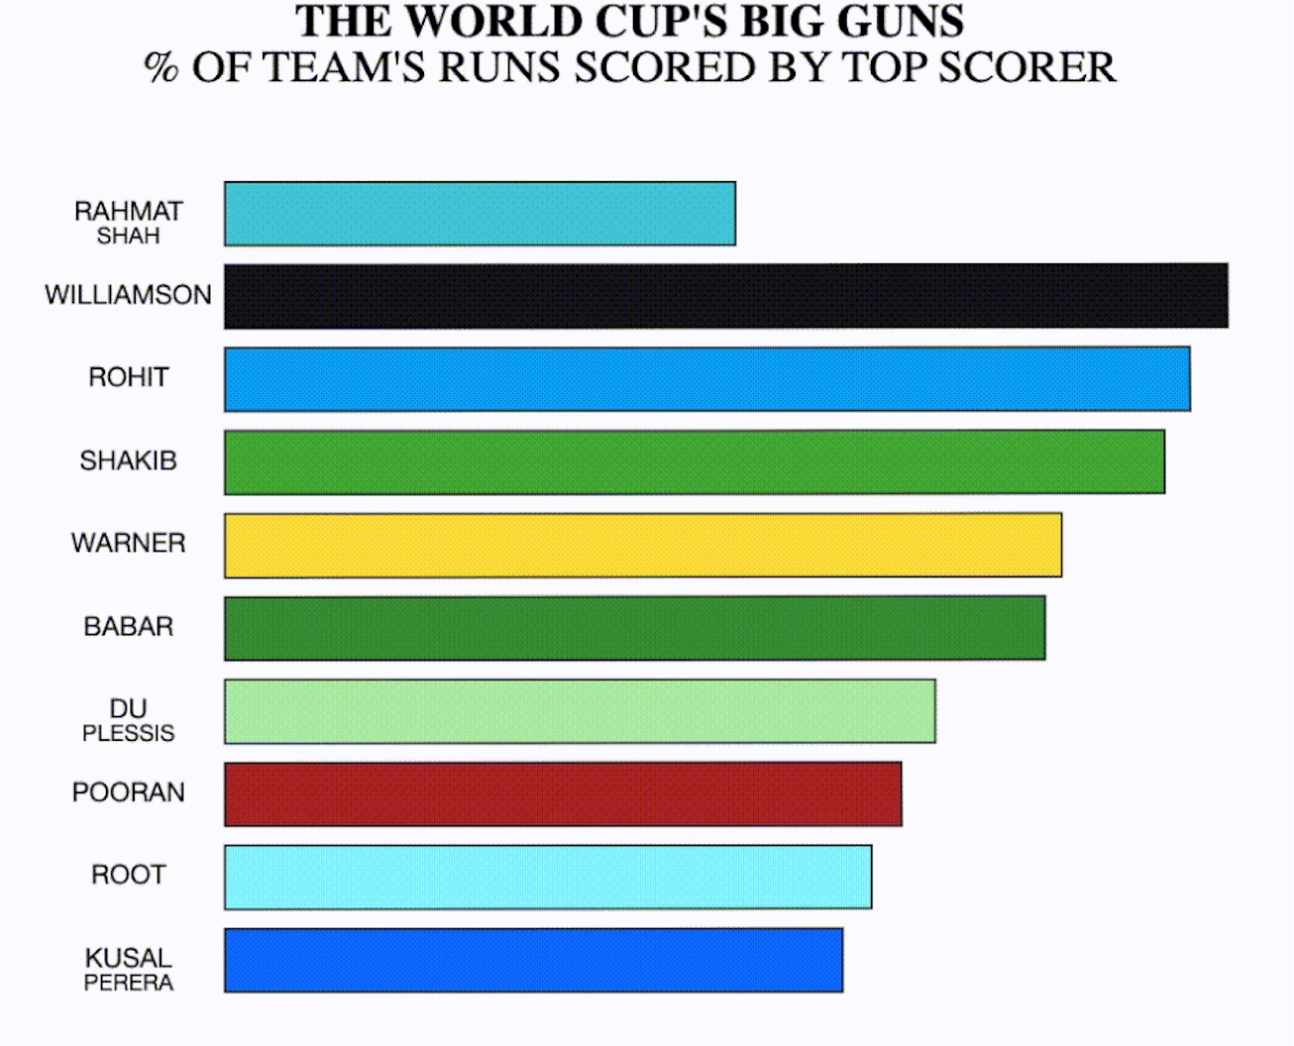

Using a DONUT CHART here is misleading as there are no relationships of parts to a whole.

1)

THE WORLD CUP'S BIG GUNS  
% OF TEAM'S RUNS SCORED BY TOP SCORER

2)

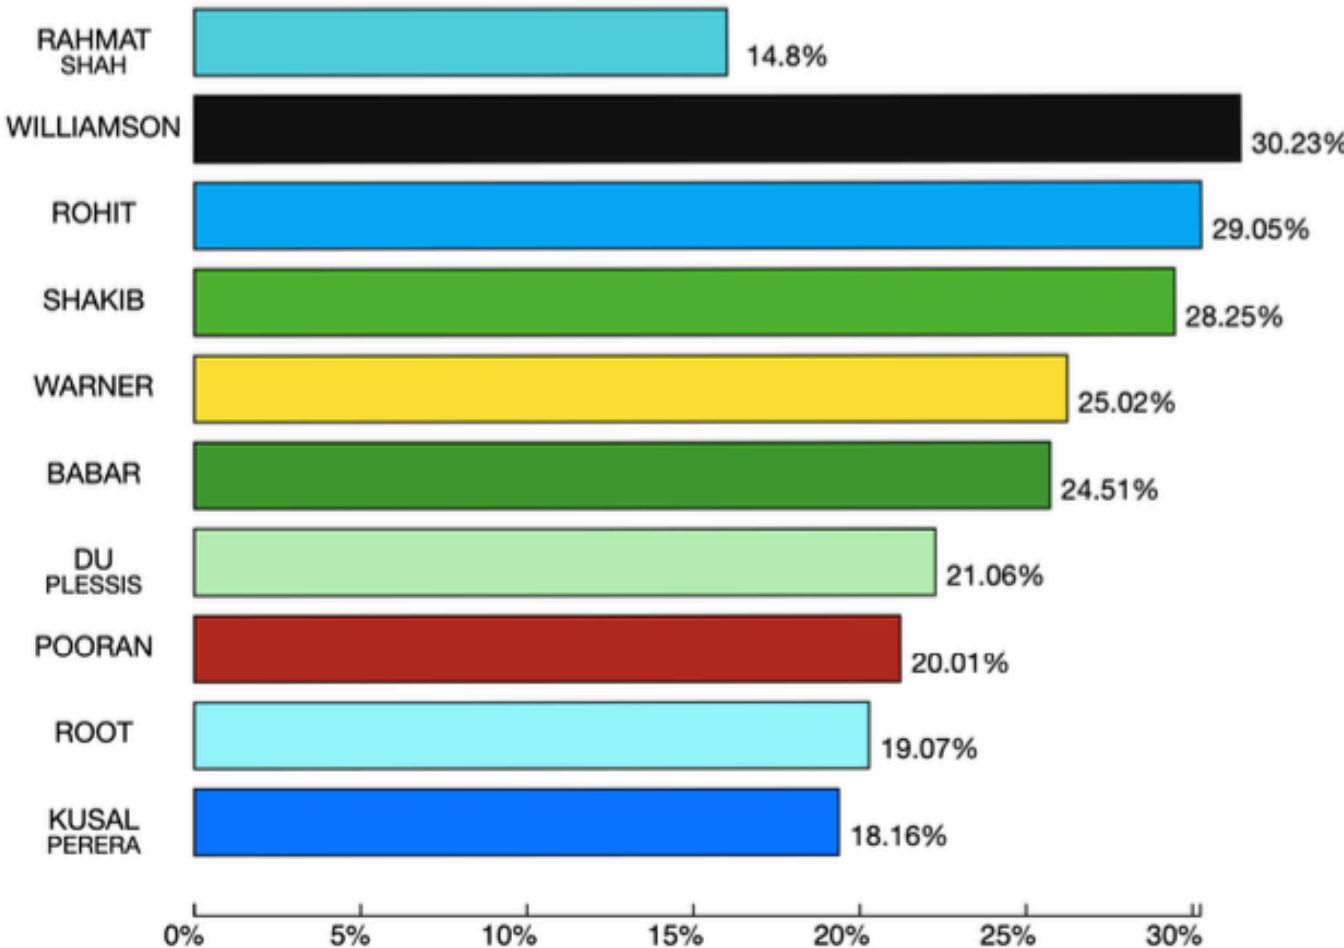

We can change the CHART TYPE and use a BAR CHART instead to represent the values of interest.

By adding AXES and LABELS, we provide readers with GUIDANCE for the interpretation of the visualization.

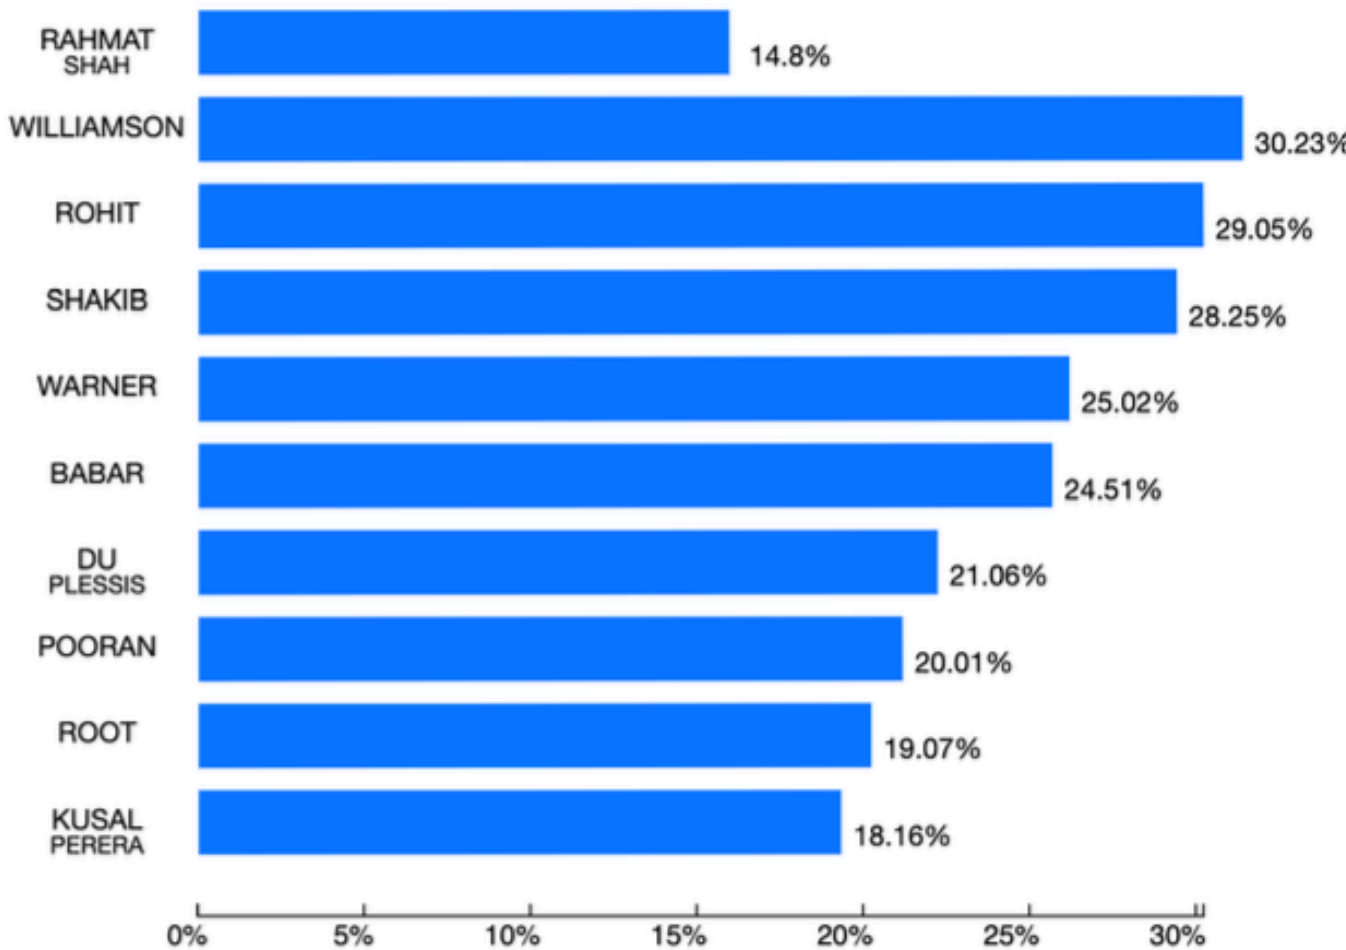

3)

THE WORLD CUP'S BIG RUNS  
% OF TEAM'S RUNS SCORED BY TOP SCORER

4)

THE WORLD CUP'S BIG RUNS  
% OF TEAM'S RUNS SCORED BY TOP SCORER

The COLOR ENCODING can be improved too by using only one color hue.
